- Technology

Author of the 2011 book "Communicating with the Future," Futurist Speaker Thomas Frey is a powerful visionary who is revolutionizing our thinking about the future.

"The greatest value in understanding the future comes from spotting the major cultural, demographic, societal, and economic shifts early and translating them in to viable business strategies," says Tom.

Thomas continually pushes the envelope of understanding by creating fascinating images and understandings of the world to come. He has been fortunate enough to headline events along with some of today's most recognizable figures: Tom Peters, Nobel Peace Prize winner Mohammad Yunus; former CEO of General Electric, Jack Welch; former New York City Mayor Rudy Giuliani; Former President of Colombia, Andrés Pastrana; Prime Minister of Spain, Felipe González Márquez; Nobel Prize winning economist Joseph Stiglitz; Saudi Prince Turki AlFaisal; and former World Bank President James Wolfensohn.

As the Executive Director and Senior Futurist at the DaVinci Institute, he works closely with the Institute's Senior Fellows and Board of Visionaries to develop original research studies, which enables him to speak on unusual topics, translating trends into unique opportunities. Because of his work inspiring inventors and other revolutionary thinkers, the Boulder Daily Camera has referred to him as the "Father of Invention" while The Denver Post and Seattle Post Intelligencer have referred to him as the "Dean of Futurists".

Thomas has been featured in hundreds of articles for both national and international publications including New York Times, Huffington Post, Times of India, USA Today, US News and World Report, The Futurist Magazine, Morning Calm (in-flight magazine for Korean Airlines), Skylife (in-flight magazine for Turkish Airlines), ColoradoBiz Magazine, Rocky Mountain News, and many more. He currently writes a weekly "Future Trend Report" newsletter and a weekly column for FuturistSpeaker.com.

Before launching the DaVinci Institute, Thomas spent 15 years at IBM as an engineer and designer where he received over 270 awards, more than any other IBM engineer. He is also a past member of the Triple Nine Society (High I.Q. society over 99.9 percentile)
