MAGDA LILIA CHELLY

FOUNDER "WOMAN IN CYBER" INITIATIVE

Magda Chelly is the Managing Director of Responsible Cyber Pte. Ltd. – an official CISCO partner. For the past years, Magda has initiated various actions around cyber security awareness, including Woman In Cyber, an initiative promoting gender diversity in the cyber security space.

She launched a Professional Diploma in Cyber Security, Cloud and Internet of Things in Singapore, in collaboration with Trent Global College and she also taught at the university level at Telecom SudParis, in France.

As well as this, Magda heads up the global cyber security education program with K2 Partnering Solutions across 19 locations in the World. Her numerous professional publications focus on human behaviour and human error impact on cyber security measures, as well as user behaviour monitoring and analytics tools. Her current research concentrates on social engineering attacks, with her latest webinar for the Information Systems Security Association - ISSA.

With her PhD in Telecommunications Engineering and her specialisation in cyber security, Magda is passionate about human aspect in cyber security, diversity and cultural impacts on privacy and security controls. She has an extensive experience of delivering cyber security advisory programmes to organisations around the world and advising Global Chief Information Security Officers of Fortune 500 companies. She is also multi-lingual, speaking English, Arabic, French, Italian and Polish.
